

Instructions

To glaze the three baubles and stocking bauble:

1. Brush your desired colours on each of your baubles. Our example shows baubles in Christmas Red, Racing Green and White Zircon. Followed by the Stocking with the three colours. Apply 2-3 layers to the baubles.
2. Once the Baubles are dry paint on with a smaller tipped paintbrush, paint-coloured circles of your choice on the bauble. On the examples we've painted racing green on top of the Christmas red, Christmas red on top of the racing green, and both green and red on top of white zircon.
3. Once your baubles are dry, place them carefully on two stilts on your kiln shelf. The stilts will stick slightly to your bauble, but they come off easily and they stop it from sticking to your kiln shelf.
4. Now you are ready to program the kiln, use an **Earthenware 1050 programme as seen below.**
5. When the kiln has cooled down, remove the Baubles from the kiln and remove the stilts
6. Affix the hanger cap to the baubles.

Segment	Rate (°/hr)	Temperature	Hold
Segment 1	150°C (302°F)	600°C (1112°F)	0 min
Segment 2	250°C (482°F)*	1050°C (1922°F)	10 min

*Full power or as faster rate as possible
